

Project Design Phase-II

Data Flow Diagram & User Stories

Date	30 July 2026
Student Name	MD. Adil Shariff
Project Name	Intergalactic Space Travel Request (ISTR) System
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
 Mission Requester	Mission Request Management	US-1	As a mission requester, I can submit a new mission request by filling all required details.	Mission request is submitted successfully and a request number is generated.	High	Sprint-1
		US-2	As a mission requester, I can upload supporting documents with my request.	Documents are uploaded successfully and linked to the request.	High	Sprint-1
		US-3	As a mission requester, I can track the status of my mission request.	Status is visible in real-time with each approval stage.	High	Sprint-1
		US-4	As a mission requester, I will receive email notifications for every update.	Email notifications are received for submission, approval and rejection.	Medium	Sprint-1
 Manager	Approval Management	US-5	As a manager, I can review and take action on mission requests assigned to me.	Manager can approve or reject the request.	High	Sprint-1
		US-6	As a manager, I can add comments while approving or rejecting a request.	Comments are saved and visible to the requester.	Medium	Sprint-1
 Finance Officer	Budget Approval	US-7	As a finance officer, I can review budget details of mission requests.	Budget information is visible with the request.	High	Sprint-2
		US-8	As a finance officer, I can approve or reject the request based on budget availability.	Budget approval status is updated in the system.	High	Sprint-2
 Mission Control	Mission Review & Authorization	US-9	As mission control, I can review mission feasibility and details.	Mission details are visible in a single view.	High	Sprint-2
		US-10	As mission control, I can authorize the mission for scheduling.	Mission is authorized and status is updated to "Approved".	High	Sprint-2
 System Administrator	System Administration	US-11	As an administrator, I can manage users, roles and permissions.	Users and roles are created and updated successfully.	High	Sprint-1
		US-12	As an administrator, I can manage catalog items and approval workflows.	Catalog items and workflows are created and activated successfully.	High	Sprint-1
