

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30 July 2026
Student Name	MD. Adil Shariff
Project Name	Intergalactic Space Travel Request (ISTR) System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Mission Request Management	Create Mission Request View Mission Request Edit Mission Request Cancel Mission Request
FR-2	Approval Workflow	Manager Approval Finance Approval Mission Control Approval
FR-3	Workflow Automation	Automatic Status Updates Email Notifications Flow Designer Automation
FR-4	User & Access Management	Role-Based Access Control (ACLs) User Groups & Roles Secure Authentication
FR-5	Mission Tracking & Reports	Dashboard Monitoring Mission Status Tracking Reports & Analytics
FR-6	Form Validation & Business Logic	Client Scripts Validation UI Policies Business Rules

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Provide an intuitive and user-friendly Service Catalog interface for submitting and managing mission requests.
NFR-2	Security	Ensure secure access using Role-Based Access Control (ACLs), user authentication, and data protection mechanisms.
NFR-3	Reliability	Ensure accurate workflow execution, data consistency, and dependable approval processing.
NFR-4	Performance	Process mission requests, approvals, and notifications with minimal response time and optimized workflow execution.
NFR-5	Availability	Ensure the application is continuously available to authorized users with minimal downtime.
NFR-6	Scalability	Support increasing numbers of mission requests, users, and approval workflows without degradation.
